Light is OSRAM

OT FIT 150/220-240/12 P

Benefits

Small housing design for target application installation. Versatile scope of application due to output power range of up to 150 W.

UV resistant.

Salt mist resistant.

L1

188 mm

53 mm 31,5 mm

Applications

Signage lighting, channel letter lighting, backlighting, etc... Suitable for indoor and outdoor SELV installations

Approvals

In preparation, if not already printed on product label

Product Features

- Suitable for Class I/II luminaire
- SELV, Vout: 12,5 V
- Wide ta range -40°C ... +50°C
- Driver with output power range of up to 150 W
- High efficiency up to 90 %
- **Smart Power Supply**
- THD<10% at full load
- High IP protection (IP66 / IP67)

- High surge protection: up to 6 kV (L-N) / 6 kV (L/N-PE)
- Mains voltage: 220 240 V_{AC}
- Overload protection
- Over temperature protection
- Short circuit protection
- 50'000 h lifetime at tc TBD°C.
- 5 years guarantee*

^{*10%} cumulated failure

Protection

Over temperature, Overload, Short-circuit, open-circuit, Reversible.

Remarks

- Output short circuit protection: auto reversible when fault removed.
- Output overload protection: auto reversible when fault removed.
- Over temperature protection: auto reversible when fault removed. Temperature on t_c point must not exceed t_c max. Derating for LED load is necessary if t_a is higher than 50°C.
- No load operation: do not put a switch between ECG and load.
- **Waterproof:** the driver is designed for outdoor installation with IP66 / IP67 protection grade. Input and output cables must be connected by means of a sealed cable clamp.
- LED wire length: 10 m EMI verified. Max cable length of 10 m recommended.
 EMI may be interfered by on site installation condition with longer cable. For longer cable (> 10 m), cable with larger cross section area is needed to cover voltage drop.
- Exit cables: the supplied, internally wired cables cannot be replaced; if the cord is damaged, the LED driver must be replaced.
- Keep enough distance from the ceiling corner or other drivers to avoid overheat. The driver must not be covered by flammable materials. At critical conditions showed by below picture (Full load, t_a = 50°C, driver on the corner of ceiling), refer to below distance. At normal installation, distance can be shorter but temperature at t_c point must be within t_c max.
- For detailed application notes, please refer to user instructions.
